

Article V.C.3. Use of Video Cassette Equipment and Copyrighted Television Programs

The District is committed to observance of the Federal Copyright Laws. This includes - but is not limited to - print material, music, and computer software. Preparation and use of video cassette programs must also be in compliance with these laws.

It is the responsibility of the office of school services to keep District personnel advised on the status of copyright laws and the applicability to District operations so that District personnel may perform their duties within the intent of the law. Those employees in violation of Federal Copyright Laws and District policies relative to same will be held responsible. (See Administrative Memorandum No. 48.)
