

Article VII.E.1. Energy Management General Responsibilities

- A. The energy conservation and safety department has the responsibility to monitor the consumption of energy and water resources at all District facilities and to develop plans and procedures to assure economical and efficient use of these resources. (See Administrative Memorandum No. 36.)

- B. This department is responsible for working with District personnel at all levels to increase awareness of the importance of energy and water conservation as a national priority and to relate the District effort to the individual role of every employee and student.
