

STUDY LIST RECOMMENDATIONS

February 3, 2015

Annual Population Analysis Committee Review Procedures

December to December Study Cycle

December - February

Gather information, ideas and suggestions for potential boundary studies - vet through the PAC

February

Present to the Board of Education for consideration a new boundary study list

February thru June

Meet with school committees and study needs, wants, possible impacts & benefits and potential solutions

June

Population Analysis Committee presents an initial report to the Board in a study session, based upon department review and school committee feedback

June - August

Potential Solutions are refined based on Board input and these solutions are presented to school committees for further consideration

September

Population Analysis Committee submits recommendations for public open house meetings

October - December

Based on Board guidance, the PAC refines solutions and gives final recommendations to The Board as a second reading

Arcadia Elementary Feeder Pattern Study

Cyprus Network Reconfiguration and Boundary Study

4800 West Corridor Boundary Study

Arcadia Elementary Feeder Pattern

This proposal would have Arcadia Elementary students feed into Bennion Jr. and then Taylorsville High School
instead of

Bonneville Jr. and Cottonwood High School

This change would create a net loss of approximately 180 students for the Cottonwood Network and a corresponding net gain of 180 students for the Taylorsville Network

Cyprus Network Reconfiguration *and* Boundary Study

This study, initiated by the combined Cyprus Network, originally began as a 9th grade reconfiguration study. However, based on physical resources it has also developed into a boundary inquiry.

This initial proposal considers:

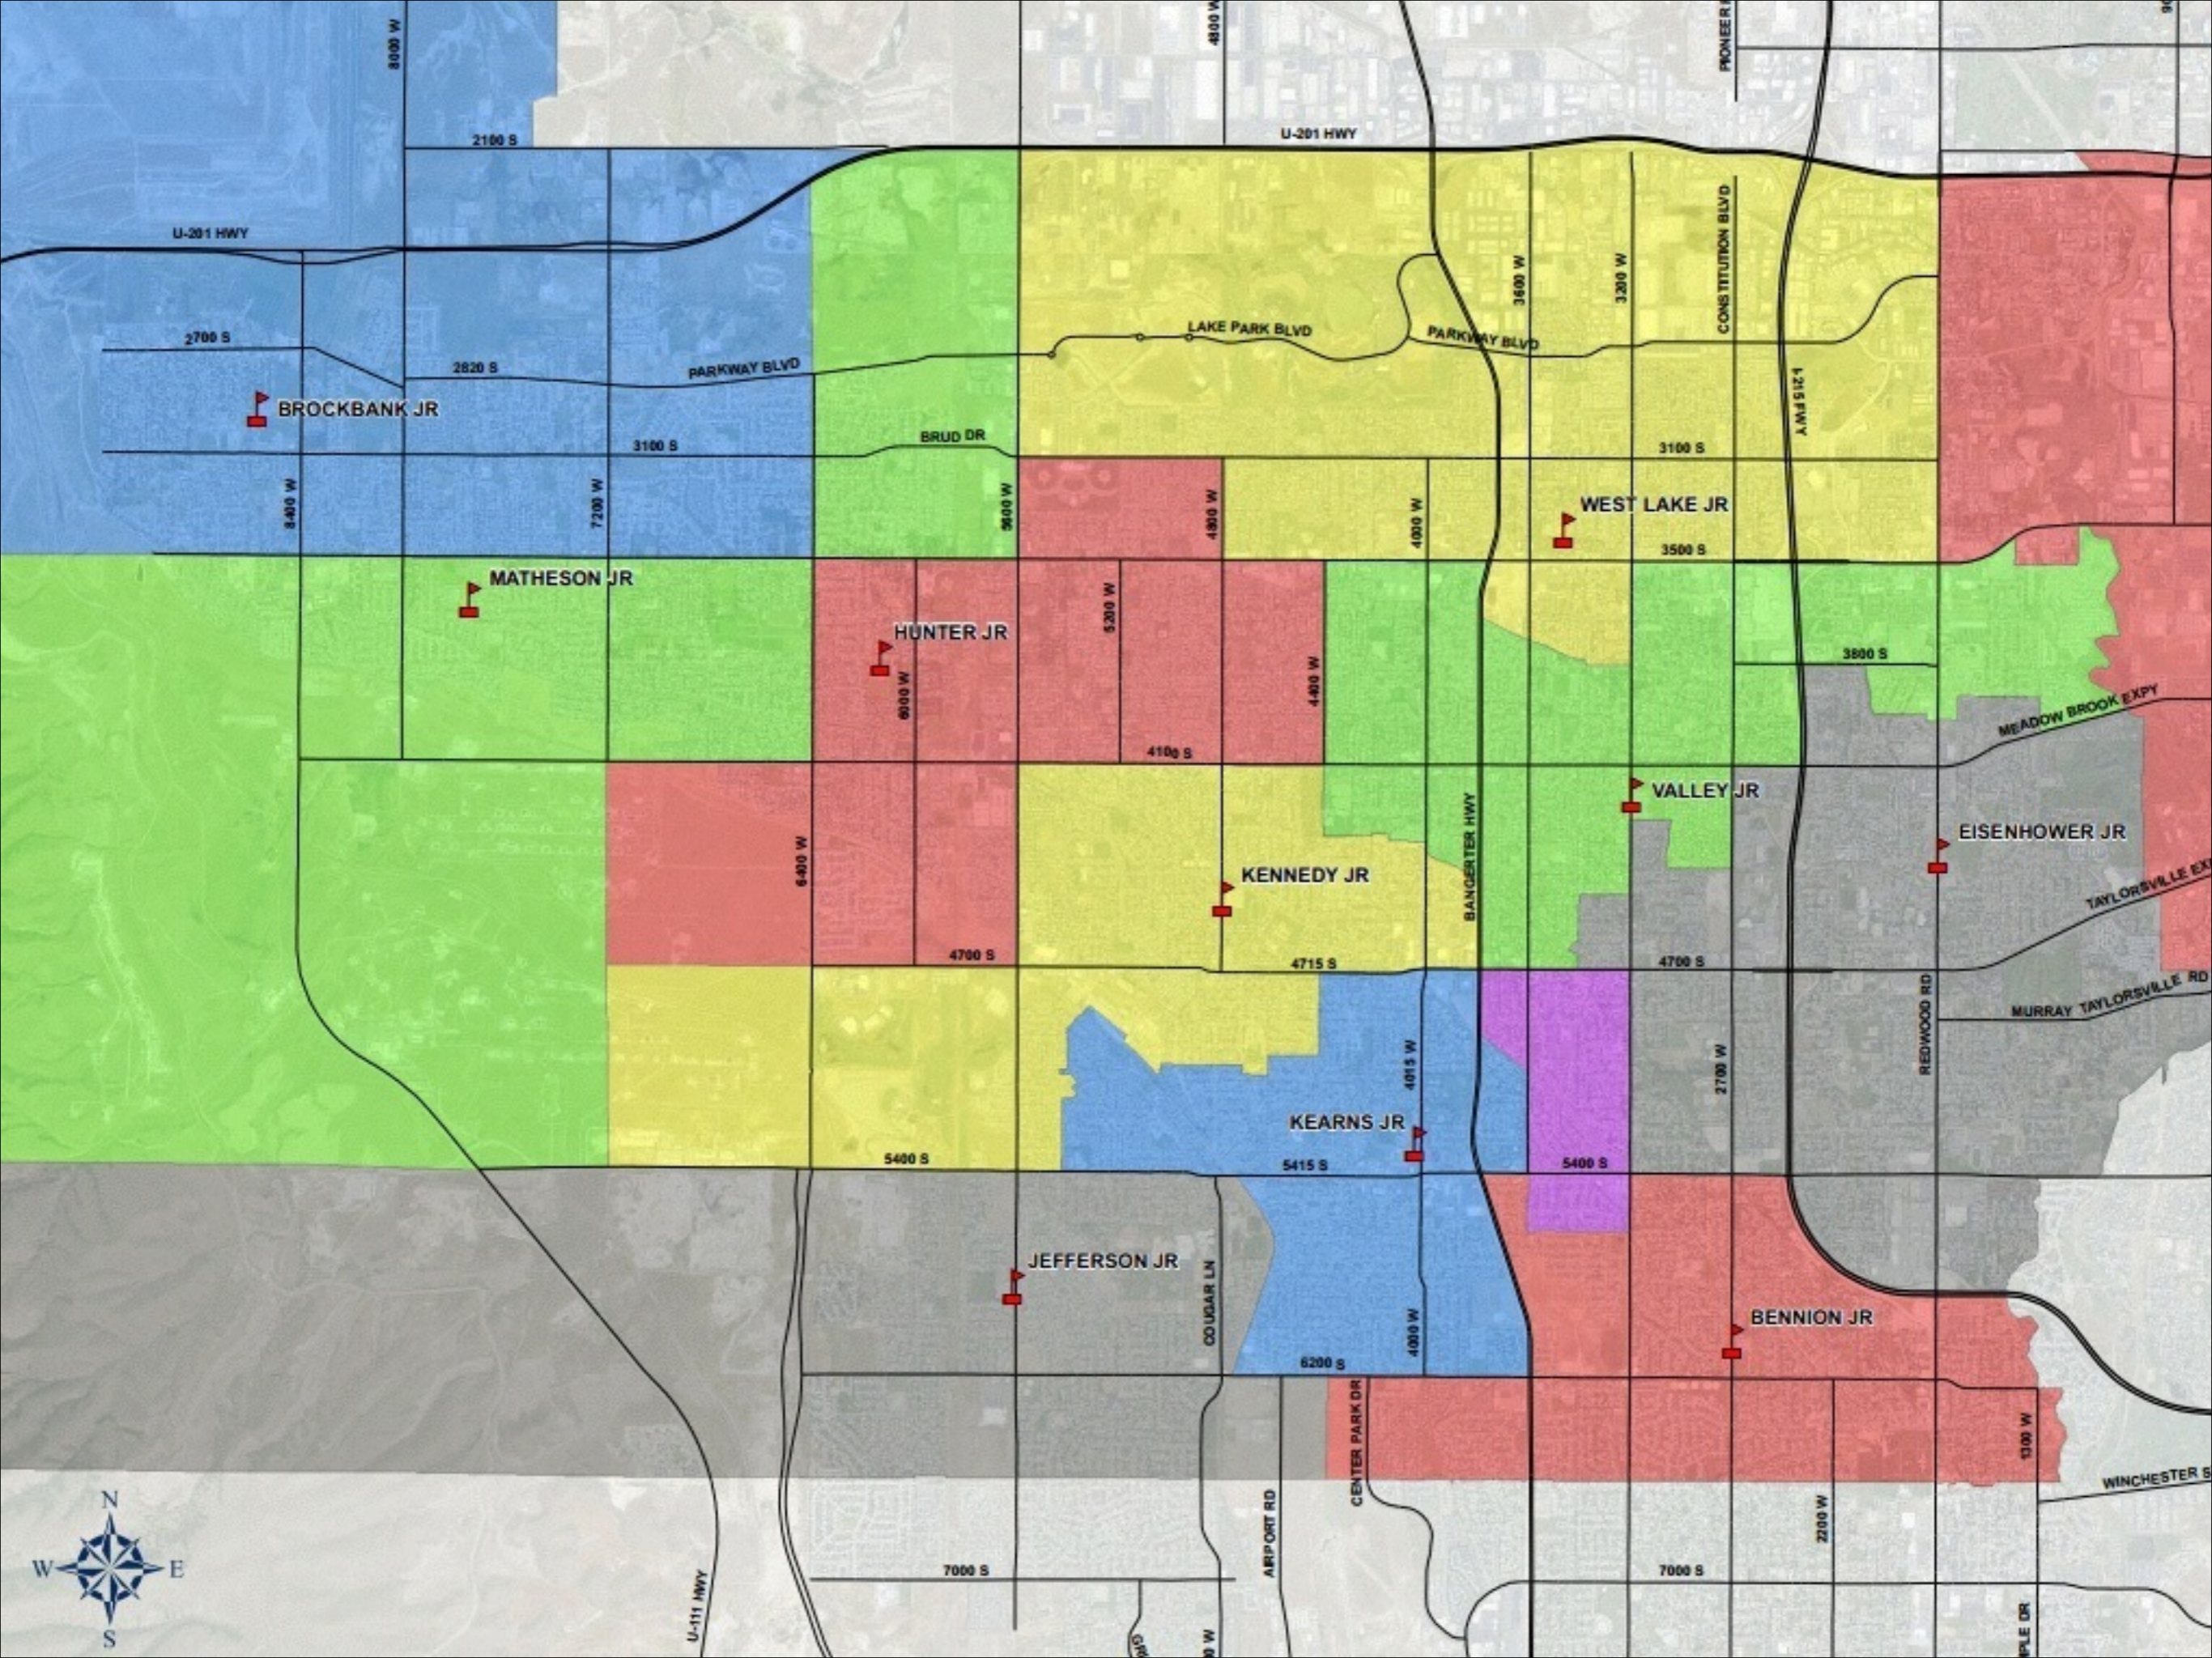

9th-12th grade at an *extended Cyprus campus* that includes Brockbank Jr. High.

Matheson Jr. High would absorbing most of the 7-8 graders

A potential boundary adjustment between Matheson Jr. and Hunter Jr.

4800 West Corridor Boundary Study

Because of recent and future reconfigurations at high schools this study would consider balancing enrollment and transportation concerns among several west side Jr. Highs

BROCKBANK JR

MATHESON JR

HUNTER JR

KENNEDY JR

KEARNS JR

JEFFERSON JR

BENNION JR

WEST LAKE JR

VALLEY JR

EISENHOWER JR
