Studies**

# Boundary Study Timeline

February - The Population Analysis Committee (PAC) recommends a study list

February through May - Representatives from the PAC meet with school committees

June - PAC presents initial report in June board study session where potential solutions are refined based on board input

**July through September** - The potential solutions are vetted with the school community councils and are further refined.

**October** - The committee then submits options to the board. The board decides if one of these options is to be presented at open house forums

**October** - Open houses conducted

**October/November** - Public Input compiled

**November** - Based on board guidance the PAC refines recommendations and submits the final proposal for a first reading

**December** - Finally, the PAC reviews all input with recommendations to the board to vote on in a final action during board meeting

# Cyprus Network Reconfiguration and Boundary Study

Now that Cyprus High Reconfiguration has been  
decided our efforts are now focused on the  
*boundary* portion of the study

Meetings will begin again in the Cyprus Network in next couple of weeks to begin collecting more community input.

So far the community seems to be talking mostly about 7th and 8th graders at Matheson while Brockbank and the Brockbank name would continue as an extension of Cyprus High campus.

Matheson's current enrollment is approximately 1210. A boundary shift that would allow Matheson to be a 7th and 8th grade school with an enrollment of 990 is being considered.

# 4800 West Corridor Study

Current Junior High Boundaries

# 4800 West Corridor Study

Summary: Since 9th grade reconfiguration has taken place in most west side high schools, and changed the dynamic of key enrollment trends, it is timely to consider boundaries that reflect a more balanced enrollment and at the same time maintain the high school feeder patterns.

## Current Enrollment

Brockbank - 930 (7-9)

Matheson Jr.- 1220 (7-9)

Hunter Jr. - 640

Kennedy Jr. - 650

Kearns Jr. - 550

Valley Jr. - 650

West Lake Jr. - 850

## Potential Enrollment

Brockbank - 700 (9 only)

Matheson Jr. - 990 (7-8)

Hunter Jr. - 875

Kennedy Jr. - 750

Kearns Jr. - 675

Valley Jr. - 710

West Lake Jr. - 790

Junior High - Areas of Change

# 4800 West Corridor Study

Junior High - Elementary Overlay

# Impacts?

Creates much needed balance in enrollment in Jr.  
Highs

This boundary change would *create* one split feeder  
out of Hunter Jr. High

However, it would also clean up three elementary  
split feeders - Pioneer, West Kearns and Jackling

The junior high administrations and community councils have responded favorably to these proposals. The elementary feeder patterns into different jr. highs will likely generate the most questions in the communities.

The PAC recommends further meetings with community councils and scheduling open houses.
