**SUBJECT: Bond Funding for Hunter High School Addition**

Dear Dr. Bates,

As you and Board members will recall, the district long-range capital plan consists of a combination of an infusion of bond funds and then a transition to “pay-as-you-go” funds. As the first bond issuance is being drawn upon, we have been advised by bond counsel that, pursuant to state code, the voter information packet does not clearly describe the cashflow mechanism. Consequently, to be strictly compliant with state law, we have been advised that the board should act affirmatively to approve expenditure of bond monies for certain projects in Phase I that were not identified as being partially funded by the bond. An unusual process in this section of State law directs that only one such modification is allowed per board meeting. As such, we recommend that the Board approve expenditure of bond funds towards the construction of the Hunter High addition.

Please note that the action request will not modify the order of the timeline shown in the attached exhibit. The timeline will remain in the order as originally intended during the 2017 bond process.

Cordially,

Rebuilds and remodels will occur as quickly as possible on a 'worst first' basis.

Rebuilding an elementary requires 10-12 months of architectural design and 12-15 months of construction.

A junior high school takes 18 months to design and 18-20 months to construct.

A high school takes 18-24 months to design and 2-3 years to construct.

\*Architectural design work has already begun for both high schools.
