The Granite Board of Education has empowered school community councils to initiate grade reconfigurations within school networks. This process may take anywhere from a few months to several years depending on scope and community interest.

**STEP 1**
An informational meeting is held upon request of a simple majority of school community councils within a school network.

**STEP 2**
Formal request of simple majority of school community councils in a network to gauge community support via third party survey.

**STEP 3**
School communities within the network gather to discuss the survey results and other pertinent information.

**STEP 4**
Formal recommendation to the Board of Education from a super majority (75%) of community councils to reconfigure grades within a requested timeframe.

**STEP 5**
If approved by the board, grade reconfiguration is implemented within a reasonable timeframe to allow schools adequate preparation time.
