

Article IX.A.5.m. Work Stoppages and Strikes

A. Statement of Policy

District administrators and middle managers will not participate in or support or encourage any collective effort to withhold services from the Board and the school system. In the event that teachers or other employees engage in any work slowdown, stoppage or other withholding of services, the administrators of the school system accept the management responsibility to carry out duties as assigned by the superintendent and the Board. Failure to do so will result in disciplinary action, up to and including termination.
